

DEEPESH SONTAKKE

Engineering Lead | Frontend Architecture | Enterprise UI Platforms

(+91) 8451012310

sontakke.deepesh88@gmail.com

Pune, India

Leveraging expertise in large-scale UI architecture, Micro Front-ends and performance-driven digital transformation. Targeting opportunities to design and modernize scalable web platforms while driving engineering governance, technical excellence and measurable business outcomes in global enterprise environments.

Core Competencies

Front-end Architecture Design

Scalable Web Application Development

Micro Front-end Strategy & Implementation

UI Platform Engineering

Component-Based Design Systems

Performance Optimization & Web Efficiency

Enterprise Application Modernization

Engineering Governance & Code Quality

Agile Product Delivery & Execution

API Integration & System Design

Technical & Other Skills

- **Front-end:** React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Node.js
- **State Management:** Redux Toolkit, Context API, React Query, Zustand
- **Styling:** HTML5, CSS3, SASS, LESS, Bootstrap, BEM
- **Architecture:** Micro Frontends, SPA, Component-driven Architecture, Atomic Design, Storybook Design Systems, Module Federation
- **Quality & Testing:** Jest, React Testing Library, ESLint, Prettier
- **Tools:** Webpack, Git, JIRA, SonarQube, CI/CD pipelines
- **Performance:** Core Web Vitals, Lighthouse, Lazy Loading, Code Splitting, Bundle Optimization, SEO Optimization

Profile Summary

- Lead Frontend Engineer / React Architect with **13.5 years of experience** building enterprise-scale digital experience platforms across **Banking, Healthcare, Travel, and Pharma** domains.
- Expertise in **React, TypeScript, Next.js, Micro Frontends, GraphQL, and component-driven architecture** for developing scalable, high-performance web applications.
- Proven experience leading **distributed engineering teams**, driving technical strategy, architecture governance, and agile delivery across enterprise projects.
- Skilled in designing and implementing **reusable design systems**, component libraries, and modern UI architectures to improve development efficiency and maintainability.
- Extensive experience integrating **CMS platforms (AEM), personalization solutions (Adobe Target), REST APIs, and GraphQL services** to deliver dynamic digital experiences.
- Strong focus on **Core Web Vitals, performance optimization, SEO, responsive design, and WCAG 2.1 AA accessibility**, ensuring exceptional user experiences across devices.
- Experienced in collaborating with **UX designers, Product Owners, Backend, QA, DevOps, and business stakeholders** to translate complex business requirements into scalable, production-ready solutions.
- Passionate about mentoring engineering teams, enforcing **code quality, best practices, CI/CD processes**, and fostering engineering excellence through technical leadership and continuous improvement.

Notable Highlights

- **Core Web Vitals Boost:** Optimized high-traffic e-commerce/SaaS dashboards using advanced code-splitting, lazy loading, and React.memo, reducing initial page load times by 40%.
- **GraphQL Implementation:** Transitioned legacy REST endpoints to GraphQL, optimizing payload sizes by 25% using Apollo Client's caching mechanisms.
- **TypeScript Adoption:** Migrated a large-scale JavaScript application to TypeScript, catching type-related runtime errors early in the CI/CD pipeline.
- **Micro-Frontend Migration:** Spearheaded the transition from a monolithic architecture to a Micro-Frontend architecture using Webpack Module Federation, enabling independent deployments and decreasing feature delivery time by 30%.
- **State & Data Caching:** Implemented React Query (TanStack) and Zustand/Redux Toolkit for global client state and server-state caching, eliminating redundant API calls and reducing server load by 30%.
- **Design System Implementation:** Architected and documented a comprehensive, reusable UI component library in Storybook, aligning with company branding and cutting design-to-development handoff time by 40%.
- **CI/CD & Testing:** Enforced 90%+ unit test coverage by establishing Jest, React Testing Library, and Cypress end-to-end (E2E) testing pipelines, catching critical bugs pre-production.
- **Security:** Implemented frontend security best practices by enforcing **Content Security Policy (CSP), sanitizing user-generated content, and mitigating XSS and clickjacking** vulnerabilities in alignment with OWASP Top 10 guidelines. Strengthened authentication and API security by enforcing **HTTPS/TLS**, integrating secure **JWT authentication** using **HttpOnly cookies**, and preventing exposure of sensitive tokens on the client side.

- **Security:** OWASP Top 10 Content Security Policy (CSP), JWT Authentication, HTTPS/TLS XSS Prevention Secure Cookies
- **CMS & Personalization:** Adobe Experience Manager (AEM), Adobe Target
- **API:** REST, GraphQL
- **AI-Assisted Development:** GitHub Copilot, ChatGPT, Microsoft 365 Copilot, Cursor, Claude, Prompt Engineering, AI-assisted Debugging Code Generation
- **Web Accessibility:** WCAG 2.1 AA standards

Education

- 2010
- Bachelor of Engineering – Computer Science
- RGPV University

Soft Skills

- Cross-functional Collaboration
- Problem-Solving & Adaptability
- Client Communication & Presentation
- Stakeholder Management
- Technical Leadership
- Engineering Mentorship
- Architecture Reviews
- Agile Delivery

Personal Details

- **Date of Birth:** 26-08-1988
- **Languages:** English, Hindi, Marathi

- **AI usage for productivity:** Improved developer productivity by ~20–30% through AI-assisted development using tools like GitHub Copilot, ChatGPT, Microsoft 365 Copilot, cursor, claude for coding, debugging and documentation.
- **Web accessibility:** Developed accessible, WCAG 2.1 AA-compliant user interfaces by implementing semantic HTML, keyboard navigation, ARIA attributes, focus management, and sufficient color contrast.

Career Timeline (Recent)

Work Experience

Frontend Lead at Cognizant Technology Solutions – Pune, Oct 2024 – Jun 2026

Key Achievements:

- Led frontend development for enterprise-scale React applications, helping teams make practical technical decisions around reusable components, application structure and maintainability.
- Conducted code reviews and technical reviews to improve engineering quality, scalability, security and maintainability.
- Contributed to Micro-Frontend modernization initiatives, supporting modular UI delivery, release agility and reduced delivery bottlenecks.
- Worked on reusable React component libraries and design-system practices to standardize UI development across teams.
- Improved Core Web Vitals and frontend performance through targeted optimization, UI efficiency and performance best practices.
- Supported engineering standards through code quality practices, Sonar compliance, branching strategy and peer reviews.
- Coordinated with Product, Backend and DevOps and **mentored 15 engineers**, helping teams deliver scalable, business-aligned frontend solutions.

Frontend Lead at Synechron Technologies, Pune, May 2023 – Oct 2024

Client: US Bank

Key Achievements:

- Led frontend development across a Micro-Frontend ecosystem spanning multiple independent repositories, supporting modular UI delivery and deployment integration.
- Built and guided React and TypeScript applications integrating REST APIs, GraphQL services, reusable components and enterprise authentication workflows.
- Improved frontend performance through Lighthouse audits, component optimization and UI tuning.
- Maintained engineering standards including SonarQube compliance and coding guidelines while sustaining **80%+ test coverage** across modules.
- Coordinated distributed frontend engineers and encouraged consistent development practices across teams.
- Participated in code and technical reviews focused on quality, scalability, security and maintainability.

Frontend Lead at Deloitte Consulting, Pune, Nov 2021 – May 2023

Client: Kaiser Permanente

Key Achievements:

- Led frontend development improvements that contributed to a **25% performance enhancement** across enterprise UI systems.
- Built reusable React component libraries and modular UI patterns to improve consistency and maintainability.
- Implemented centralized state management and unified error-handling patterns for resilient applications.
- Worked closely with Backend, QA and Product teams as the frontend owner for delivery.
- Improved developer productivity through standardized coding practices, reusable assets and consistent engineering patterns.

- Implemented reusable **WCAG 2.1 AA-compliant** React components using semantic HTML, ARIA, keyboard navigation and responsive layouts.
- Participated in technical and code reviews to maintain quality, scalability, security and maintainability.

Frontend Lead at Cognizant – Netcentric Account, Pune, Jul 2019 – Oct 2021

Key Achievements:

- **Client: Etihad Airways** – Designed Adobe Target personalization architecture, contributing to approximately 10% growth in traffic and booking conversions.
- **Client: UBS** – Pioneered React-based SPA architecture with modular design principles and SASS/BEM styling framework.

Senior Front-end Developer at Intouch Solutions, Mumbai, Mar 2017 – Jun 2019

Client: Novartis

Key Achievements:

- Directed React development team of 5 engineers as technical lead ensuring scalable delivery and architectural alignment.
- Championed single-page application development using React.js with a strong focus on maintainability and extensibility.
- Cultivated engineering excellence through structured code reviews, best-practice enforcement and developer mentorship.

Web Developer at Accenture Services, Mumbai, Nov 2013 – Feb 2017

Key Achievements:

- Modernized enterprise UI ecosystems including Veeva applications and responsive platforms with performance-centric design principles.
- Executed interactive front-end development leveraging CSS3 animations, semantic markup and modern web standards for rich UI experiences.

Web Developer at Resource Square Pvt. Ltd. (Contract: Accenture), Mumbai, May 2013 – Nov 2013

Key Achievements:

- Developed and maintained enterprise web interfaces, collaborating with cross-functional teams on large-scale web applications.
- Worked on AEM-based platforms and Veeva interactive applications, delivering responsive, performance-focused UI solutions using HTML, CSS3 and JavaScript.

Software Engineer at Health Impetus Pvt. Ltd., Mumbai, Oct 2012 – April 2013

Key Achievements:

- Developed web applications & contributed to end-to-end implementation of front-end functionality.
- Built responsive web pages and implemented JavaScript-based login, form handling and user interaction features.
